

# Sonification

## Introduction

Richard Hoadley  
2007-9  
v0.4

## Real Sonification

### Examples

- Hospitals/Medicine
- Seismic things (earthquakes, etc.)
- Communication
- Radar/Sonar
- Alarms

1. A figure of speech in which a name or descriptive word or phrase is transferred to an object or action different from, but analogous to, that to which it is literally applicable; an instance of this, a metaphorical expression.  
Cf. [METONYMY](#) *n.*, [SIMILE](#) *n.*

2007

Sonification

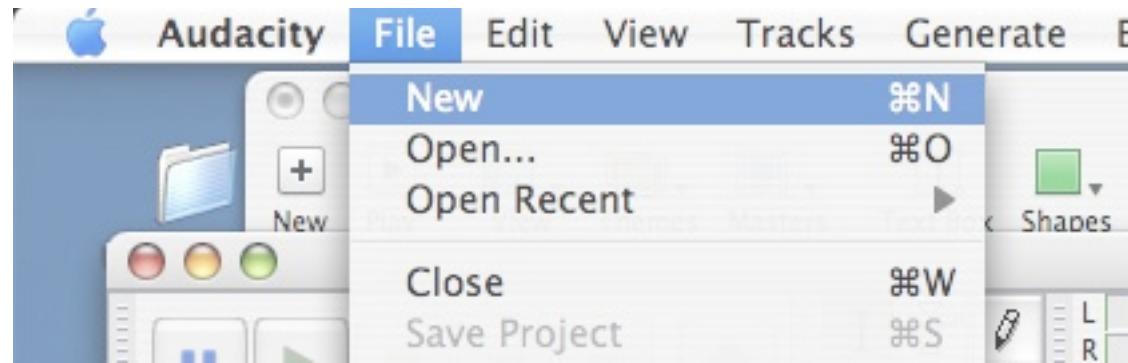

- How **convincing** is this? What do you think about it? What is the **motivation** behind the **desire** for this process? Why is it the desire for **sonification**, and not **visualisation**?

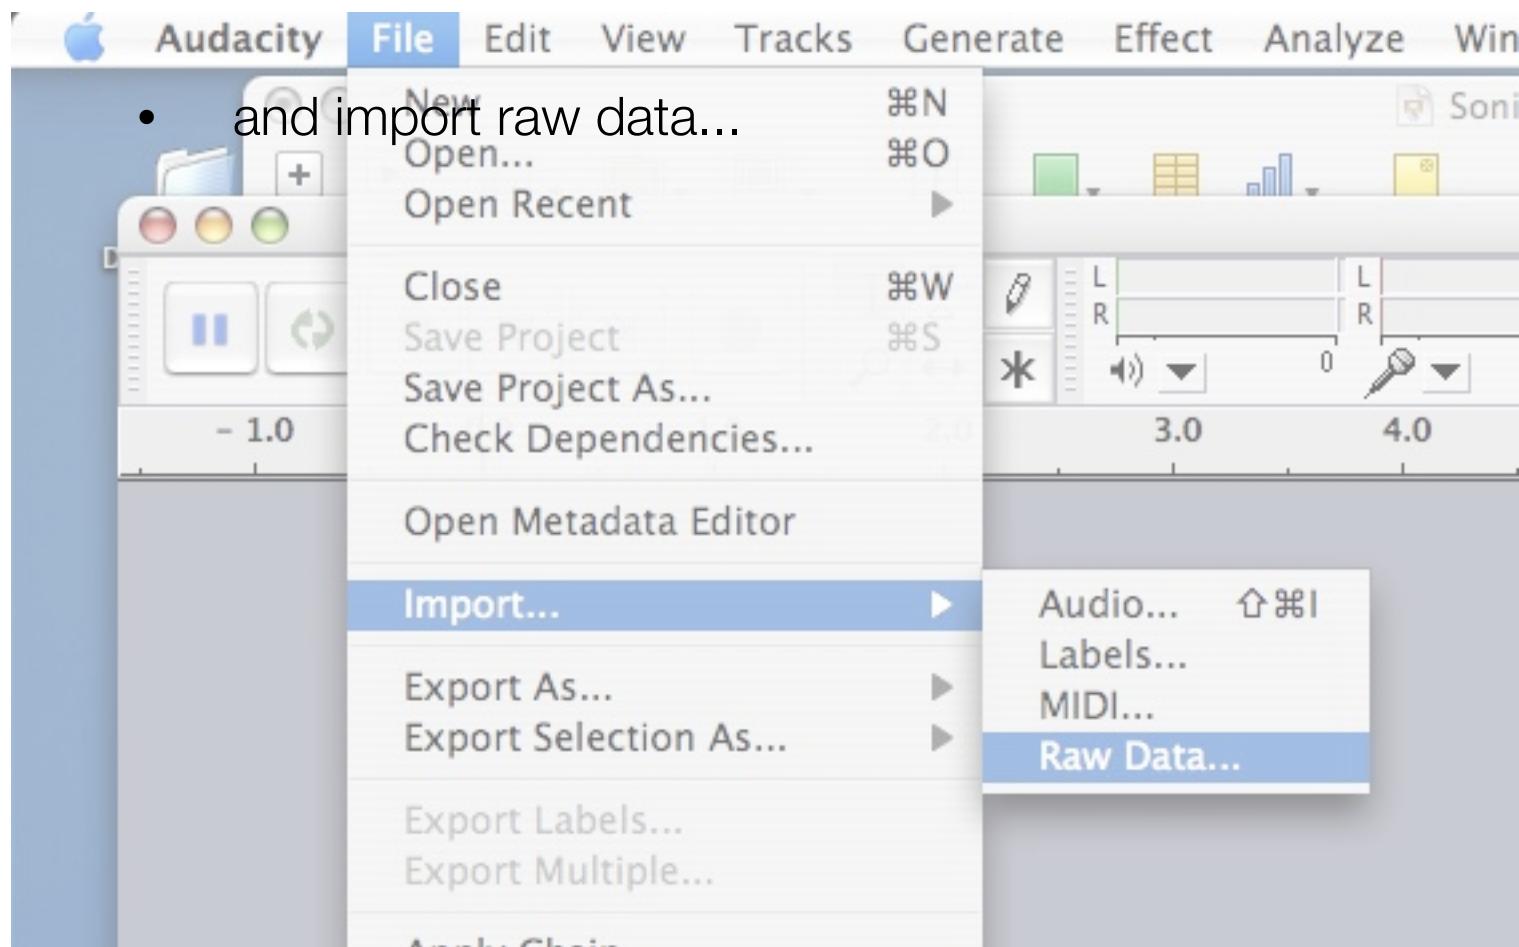

Black Circle - use any drawing software to do this, but it must be able to save the drawing in bitmap structures (not compressed), such as **pict**, or **bmp**.  
The form does **not** have to be startlingly accurate!

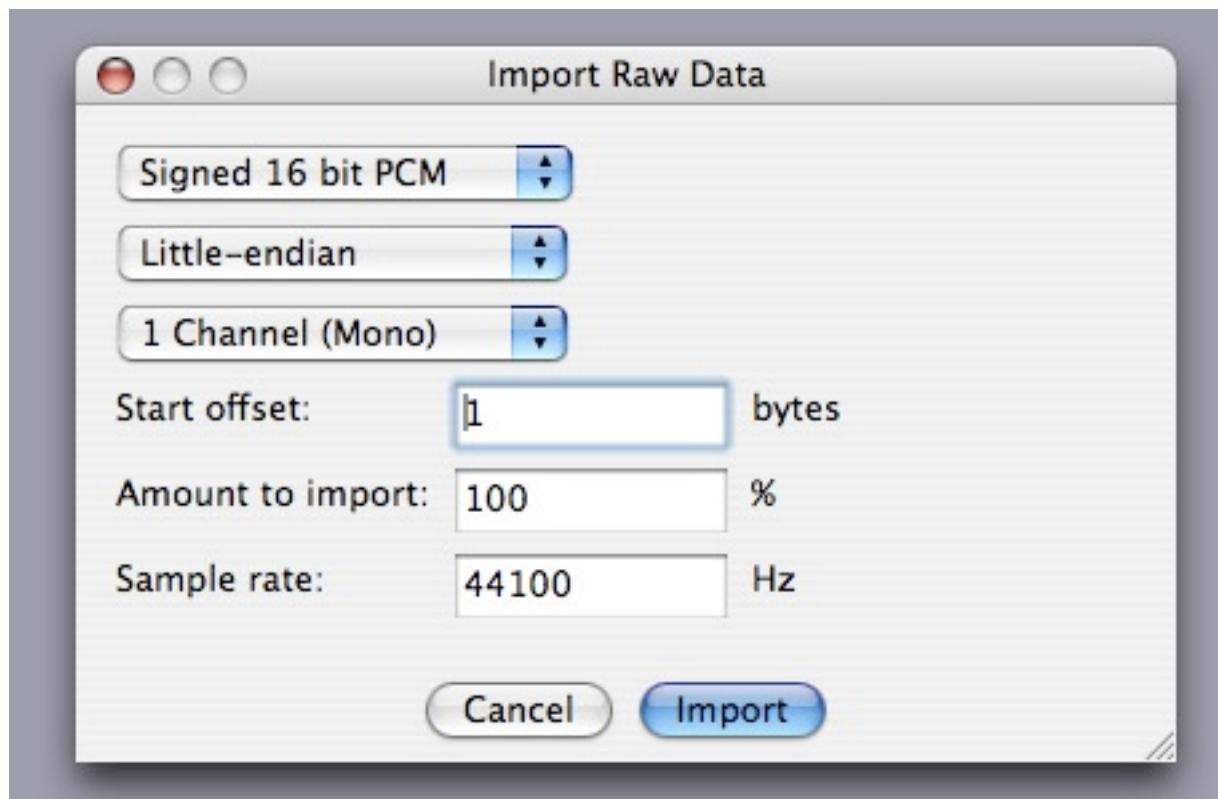

- Now open **Audacity**, or some other audio utility. Try a few if you like. I'm here using **Audacity**
- **1.3.8.** You need the programme to be 'willing' to attempt to open any raw data.

- Audacity should open a new project for you automatically, otherwise choose **File/New**.

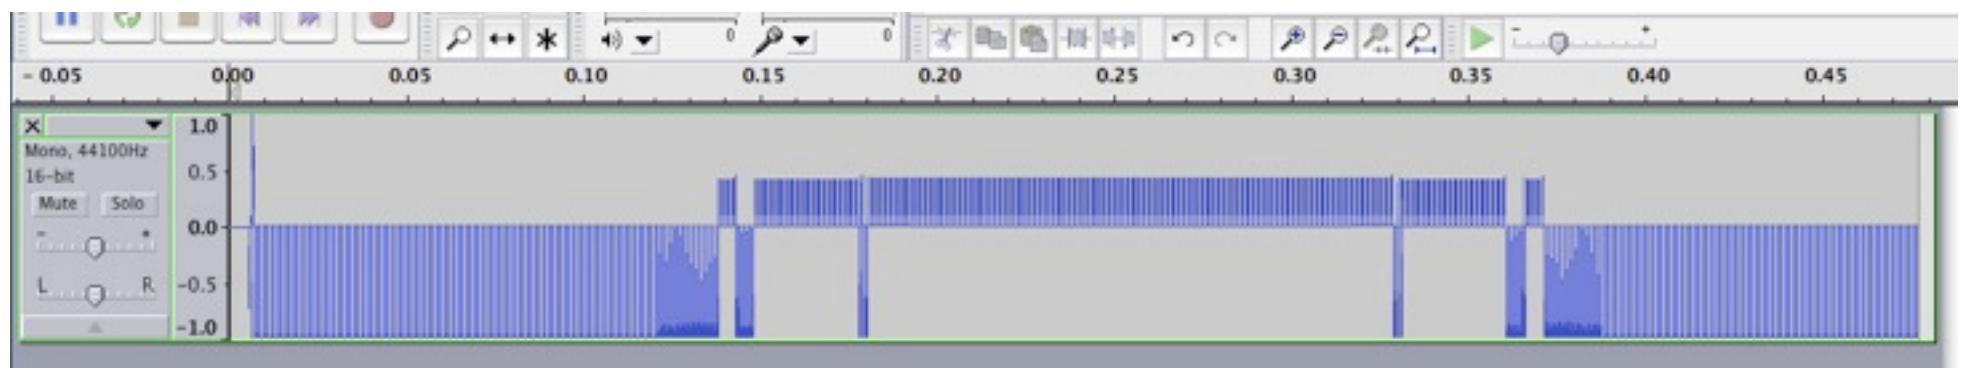

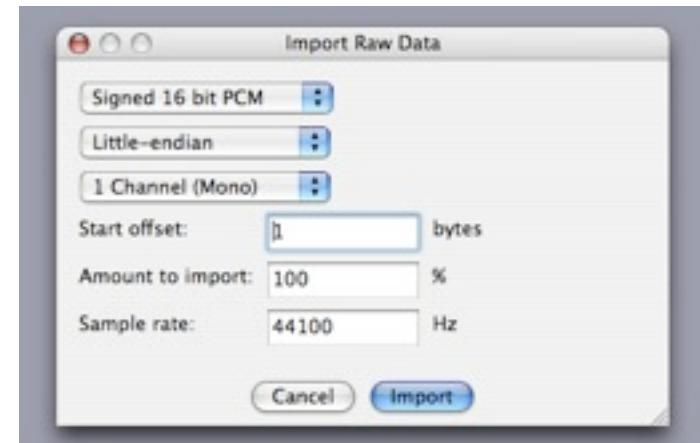

- There are some settings to choose

## Sonification

### Examples

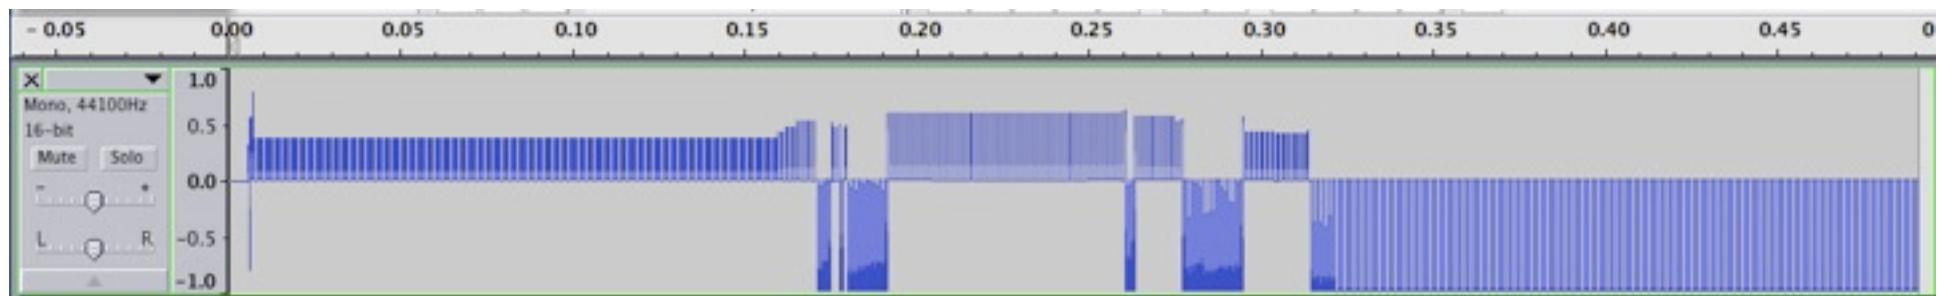

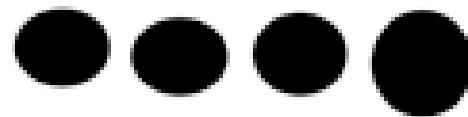

- This is 'Black Circle.pict' imported as:

## Sonification

## Examples

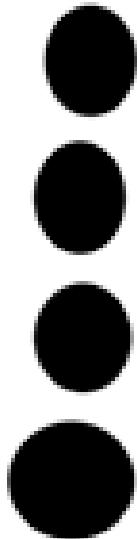

- Here's the same, but importing 'Black Circles Pict':

## Sonification

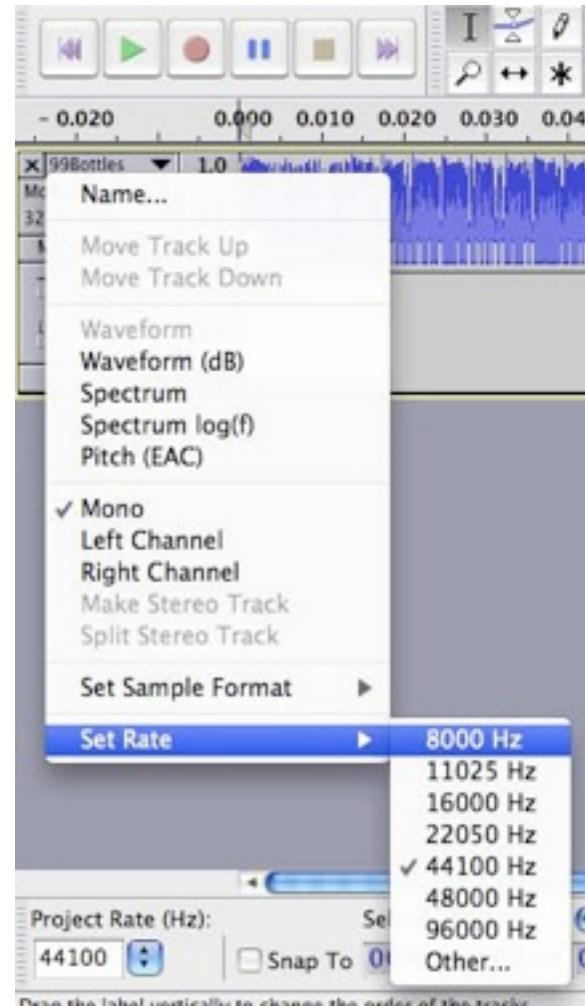

## Examples

- Now try vertically...

### Other Things to try

- Altering the sampling rate: in audacity, alter the sample rate and then export the result as a standard wav or aiff file. Then you can repeat the process. See what you can ‘find’ in the sounds.

## Creative Sonification

### Other **things** to try

- Import Data
- Different Types:
  - **Graphic File**
    - Raw - Bitmap or Pict
    - Compressed - JPEG, etc.
  - **Movie File** - try different formats
  - **Text File**
    - Import letters?
    - Import words??????
    - HTML?
  - **Spreadsheet file?**
  - **Presentation?**

## Creative Sonification

## Other Things to try

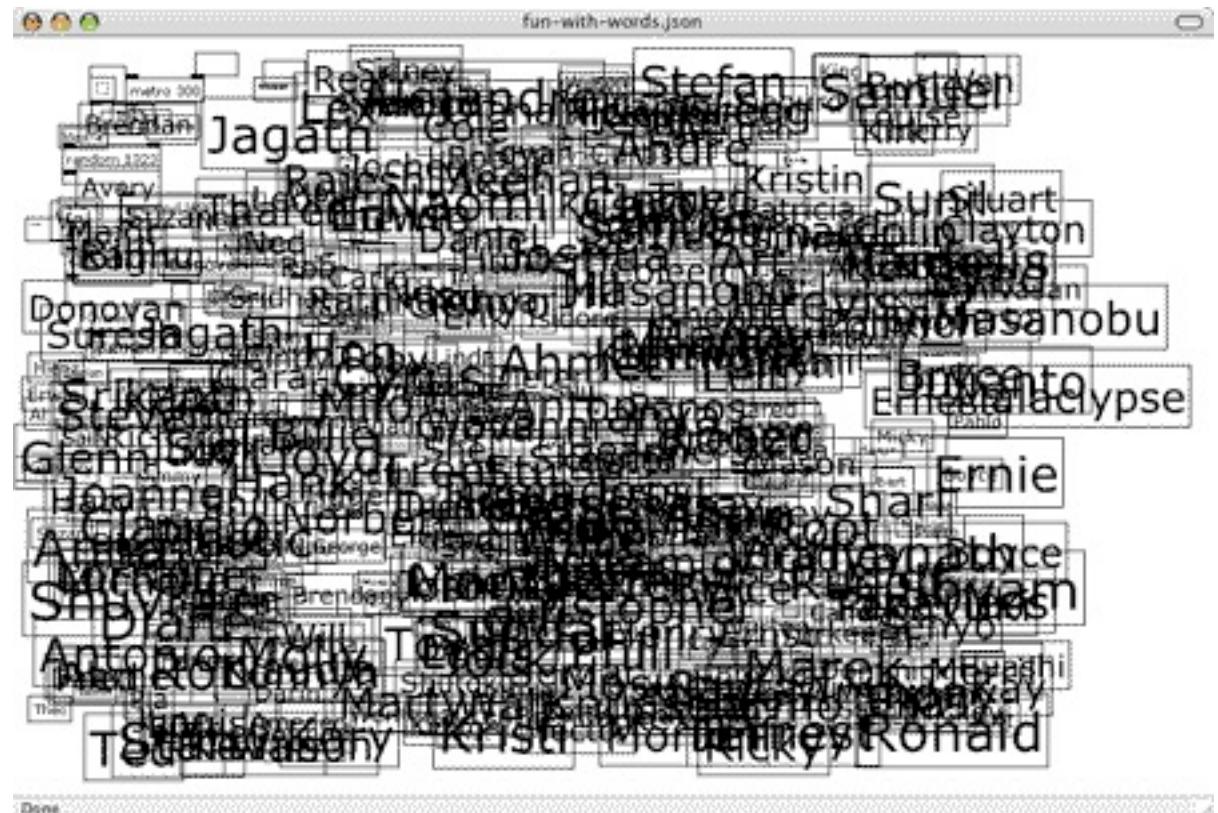

- See student examples

### Text

- Anton's piece where he 'transposed' all the letters in a poem/passage into 'attractive' notes.
- Also piece where a performer 'subjectively' interprets the rhythms of speech in a poem into an actual percussive rhythm which is then used as the basis for (or a part of) an improvisation/something else.

### Web
